Highlights of the report include (for students enrolled for master's and doctor's degrees): (1) Enrollments in programs leading to master's and doctor's degrees totaled 836,294 in fall 1971, an increase of 2.5 percent over enrollments reported in fall 1970. (2) Between 1970 and 1971, full-time enrollments increased more than part-time. (3) Gains for women, both in numbers and percent, were greater than for men between 1970 and 1971. Highlights for students enrolled for first-professional degrees in selected discipline specialties include: (1) In fall 1971, 190,749 students were enrolled in first-professional degree programs in the selected discipline specialties covered by this survey. (2) Between 1970 and 1971, enrollment of women increased by 10.6 percent. Appendixes include: reproduction of the survey report form and a taxonomy of instructional programs in higher education. HIGHLIGHTS

Students Enrolled for Master's and Doctor's Degrees

Enrollments in programs leading to master's and doctor's degrees totaled 836,294 in fall 1971, an increase of 2.5 percent over enrollments reported in fall 1970. This is a notably slower rate of growth than the 7.8-percent rise reported between fall 1969 and fall 1970.

Between 1970 and 1971, full-time enrollments increased more than part-time (4.1 and 1.0 percent, respectively).

Gains for women, both in numbers and percent, were greater than for men, between 1970 and 1971. Enrollments of women constituted 36.4 percent of the total in 1971 as compared with 35.5 percent in 1970.

The 528,151 first-year students enrolled for master's and doctor's degrees in 1971 represented an increase of only 0.1 percent over the 1970 figure. The proportion of first-year students in these programs declined slightly, from 64.7 percent in 1970 to 63.2 percent in 1971.

Students Enrolled for First-Professional Degrees in Selected Discipline Specialties

In fall 1971, 190,749 students were enrolled in first-professional degree programs in the selected discipline specialties covered by this survey. This figure represents an increase of 12.1 percent over 1970, in contrast with the 2.5-percent rise noted for master's and doctor's degree candidates.

Between 1970 and 1971, enrollment of women increased by 32.4 percent, while men's enrollment increased by 10.6 percent. Enrollment of women, however, continued to be less than a tenth of the total (7.1 percent in 1970 and 8.4 percent in 1971).

The 69,909 first-year first-professional students in 1971 represented an increase of 10.5 percent over 1970. The proportion of first-year students in these specialties declined slightly, from 37.2 percent in 1970 to 36.6 percent in 1971.

FOREWORD

This report is based on the U.S. Office of Education's 13th annual survey of Students Enrolled for Advanced Degrees (SEAD) in institutions of higher education in the United States. Data were acquired as part of the sixth annual Higher Education General Information Survey (HEGIS) in the fall of 1971.

Combined in this single publication are data formerly issued in two separate volumes. The publication provides detailed data for individual institutions, as well as summary data by State, discipline specialty, and institutional control and level. A new classification of fields of study was used for this SEAD survey, as well as for the separate survey of Degrees and Other Formal Awards Conferred Between July 1, 1970, and June 30, 1971.

A survey publication of this nature is the product of efforts of many individuals in the National Center for Educational Statistics, and of persons elsewhere in the Office of Education. While it is not feasible to cite these contributions individually, it is appropriate to recognize the role of Mrs. Agnes Q. Wells in reviewing survey responses for accuracy and completeness, and for resolving problems with the reporting institutions.

A response rate of 100 percent was attained in this survey for the third consecutive year. The Office of Education is most appreciative of the continued excellent cooperation and efforts of registrars and other college and university officials who supplied the data promptly and conscientiously.

10. Enrollment for advanced degrees, by control and level of institution, level of degree, discipline division and specialty: Aggregate United States, fall 1971 342

INTRODUCTION

Initiated in 1959, this survey was at first limited to the science, mathematics, and health-professions areas. It has been gradually broadened to its present scope of more than 300 discipline specialties intended to cover the entire range of instructional programs in higher education.

Included in this report are summary enrollment tables by level of study, attendance status, sex of student, discipline specialty, State or other area, and institutional control and level. The report also presents a listing of enrollments within each discipline specialty at each surveyed institution. In each of the four immediately preceding survey years, institutional and summary data were presented in two separate publications.

The 1971 survey instrument, with definitions and instructions to respondents, is reproduced in appendix A. The totals shown in the data cells on the facsimile form are those obtained for the aggregate United States.

The sixth annual Higher Education General Information Survey (HEGIS) in 1971-72, which acquired these data for students enrolled for advanced degrees in fall 1971, was the first to utilize the new classification of fields of study published in *A Taxonomy of Instructional Programs in Higher Education* (OE-50064). (See appendix B for a reproduction of the material in that publication.) The taxonomy has extensively reorganized the data categories in such a way as to reflect current instructional practices in institutions of higher education.

Introduction of the new field-classification system, beginning with the 1971 survey, means that any comparisons with data for previous years should be made with care. A degree of comparability is possible through use of a "translation table" (included in appendix B) which, although constructed in terms of the survey of degrees and other formal awards, may be adapted to this survey. However, the addition of new fields, together with the changed distributions and descriptions of fields formerly included, has altered the classification base to such an extent that in many cases significant comparisons would be impossible.

Instructions to the survey respondents (page 2 of the survey report form, appendix A) highlight the orientation of the new classification structure. A discussion of the background and purposes of the taxonomy (as well as of the translation table pertaining to HEGIS) is included in appendix B.

A description of the survey coverage and methodology is contained in another section of this report.

CURRENT DATA AND TRENDS

Enrollments for Master's and Doctor's Degrees

Enrollments for master's and doctor's degrees for all levels combined (first-year students and students beyond the first year) increased by 2.5 percent from 1970 to 1971—significantly less than the 7.8 percent rise noted from fall 1969 to fall 1970. National totals for 1971 are based on 822 institution; for 1970 and 1969, on 808 and 801 institutions, respectively. So far as the Office of Education could determine, these were the only institutions enrolling candidates for master's and doctor's degrees during these years.

Comparative analysis of the different subgroups of candidates in 1970 and in 1971 (see below) shows the greatest contrast in the part-time category, where women students increased by 5.3 percent while men students decreased by 1.8 percent. On the whole, full-time students showed a greater relative gain than did part-time students, and women showed a greater relative gain than did men.

	Enrollments for master's and doctor's degrees			
Sex and attendance status	1970	1971	Difference	Percent change
Grand totals	816,207	836,294	20,087	+ 2.5
Men, total	526,201	532,242	6,041	+ 1.1
Women, total	290,006	304,052	14,046	+ 4.8
Full-time total	373,064	388,521	15,457	+ 4.1

Women, part-time	177,508	186,884	9,376	+ 5.3

First year enrollments for master's and doctor's degrees increased only 0.1 percent (percent changes were −1.2 for men and 2.0 for women). This category showed a decrease in total men's enrollment as well as in part-time student enrollment. Again, the greatest contrast occurs in the part-time category, where women gained 2.7 percent and men lost 4.8 percent. "First-year students" accounted for 64.7 percent (528,151) of enrollments for master's and doctor's degrees in 1971.

Enrollments for First-Professional Degrees

In fall 1971, 190,749 students were enrolled in first-professional degree programs at all levels of study (first-year students and students beyond the first year) in the selected fields covered by this survey. This was an increase of 12.1 percent over the fall 1970 total of 170,144. (Data for 1971 are based on a total of 372 institutions; for 1970, on 362 institutions.)

Comparisons of the different subgroups of candidates show gains ranging from 10.3 percent for men studying full-time to 33.0 percent for women studying part-time. Both full-time and part-time enrollments show greater numerical gains for men, but greater percentage increases for women. Despite substantial percentage gains, women still accounted for a very small minority (8.4 percent) of all candidates for first-professional degrees in 1971.

All first-professional enrollments in selected discipline specialties

Sex and attendance status	1970	1971	Difference	Percent change
Grand totals	170,144	190,749	20,605	+ 12.1
Men, total	158,066	174,759	16,693	+ 10.6

Women, full-time	10,813	14,308	3,495	+ 32.3
Men, part-time	13,906	15,795	1,889	+ 13.6
Women, part-time	1,265	1,682	417	+ 33.0

In interpreting these findings, it should be noted that the discipline specialty of law accounted for almost half (49.5) of first-professional enrollments in fall 1971. Of the 20,605 increase in total first-professional enrollments from 1970 to 1971, 13,722 were in law.

First-year enrollments for first-professional degrees in the selected discipline specialties increased by 10.5 percent. There were greater percent increases for women than for men, but men showed greater numerical gains in all the various subgroups. Again the discipline specialty of law accounted for the bulk of the year-to-year increase.

SURVEY COVERAGE AND METHODOLOGY

Institutions Included

Data tabulations in this report are based on information furnished by 905 institutions of higher education in the United States and outlying areas (aggregate United States).

The questionnaire "Students Enrolled for Advanced Degrees, Fall 1971"—part of HEGIS—was sent to all universities and other 4-year institutions in the Office of Education's higher education survey universe for the 1971-72 academic year.[1] (The questionnaire and instructions to respondents are reproduced in appendix A.)

The 905 reporting institutions were the only institutions enrolling students for advanced degrees in fall 1971, as far as the Office of Education could ascertain. This was the breakdown of the reporting institutions:

533 had enrollments for master's or doctor's degrees only.

289 had enrollments for first-professional degrees as well as for master's or doctor's degrees.

83 had enrollments for first-professional degrees only.

Tables showing candidates for master's or doctor's degrees are based on 822 institutions; for first-professional degrees, on 372 institutions. Because all 905 institutions responded with complete survey data, it was unnecessary for the Office of Education to make any imputations or to provide any estimates for data by sex of student, level of enrollment, attendance status, or discipline specialty.

Students Included

This survey included all students enrolled in programs leading to a degree beyond the baccalaureate, and covered the same student categories embraced by the 1970 survey. Part A of the survey questionnaire covered students studying for first-professional degrees in selected discipline specialties; part B, students enrolled for master's and higher degrees. (See the section on "Survey Coverage" on page 2 of the survey questionnaire, in appendix A, for a more detailed account of students to be included.)

[1] For a description of the higher education survey universe, see *Fall Enrollment in Higher Education, 1971*, OE-73-11414. The *Education Directory, Higher Education, 1970-71* (OE-50000-71) was the primary source for the list of institutions included in the survey universe, and for any changes in fall 1971 known by the Office of Education.

Students Excluded

Student categories excluded from the survey were the same as for the fall 1970 survey, namely, those:

(1) Working for an advanced degree but not formally enrolled for the fall term.

(2) Enrolled in graduate-level curriculums or courses that would not terminate in advanced degrees.

(3) Designated as "special" and "unclassified" but not enrolled for advanced degrees.

(4) Pursuing postdoctoral work.

(5) Enrolled at a branch or extension center in a foreign country.

Student Classification

The 1971 survey, like the 1970 survey, classified students according to two enrollment levels: first-year students, and students beyond the first year. First-year students were those who had completed less than a full year of required study for an advanced degree; students beyond the first year were those at all other levels of an advanced-degree program.

Also remaining unchanged was the classification of enrollments by attendance status. As in prior surveys, a full-time student was described as one whose academic load was at least 75 percent of the normal student workload (course work or other required activity) as defined by the institution. All students carrying less than 75 percent of the normal load were classified as part-time.

Exhibit Items: "First-time students in fall 1971" and "Doctoral candidates who have completed all but dissertation." Added to Part B of the survey for 1971 were two "exhibit" items for each of the broad discipline categories. (See explanation in the section on "Survey Coverage," paragraph C, on page 2 of the survey questionnaire in appendix A.) Counts, or best estimates, were requested of "first-time students in fall 1971" and of "doctoral candidates who have completed all but dissertation" in order to obtain important indicators of the production rate of doctorates in each discipline. (See paragraph 8 of the instructions for part B on page 6 of the survey questionnaire in appendix A.)

Survey Content

In 1971 a major reorganization of the survey content was necessary to bring into use the new classification of discipline divisions and discipline specialties contained in *A Taxonomy of Instructional Programs in Higher Educa-*

tion (OE-50064). (See appendix B.) A determined effort was made to provide institutions with advance information and time to convert internal record-keeping procedures to the new taxonomy categories. Development of the taxonomy, which was the result of several years of cooperative effort with the higher education community, entailed extensive consultation and review. Preliminary copies for comment and criticism were sent to all U.S. colleges and universities, to a large number of educational associations and organizations, and to Federal agencies concerned with education. The final version was developed cooperatively by the National Center for Educational Statistics and the Bureau of Research, both of the Office of Education, and by the National Center for Higher Education Management Systems at the Western Interstate Commission for Higher Education. Copies of the published taxonomy were made available to all institutions of higher education early in January 1971, and another copy was enclosed with the HEGIS package containing the fall 1971 survey of students enrolled for advanced degrees.

Use of the taxonomy in all HEGIS surveys acquiring data by academic field, as is planned, will facilitate studies of interrelationships among various types of data involving instructional programs.

Data Verification

To obtain complete and accurate data, the completed questionnaires were examined and analyzed. The analysis included review for compliance with instructions to respondents. Data were further compared with available data reported by respondents in previous surveys of students enrolled for advanced degrees, taking into account coding changes necessitated by adoption of the new taxonomy categories for instructional programs, and using the taxonomy table which translates the fields of study used in earlier surveys into the new coding system. Reference was frequently made to institutional catalogs and other materials for descriptions of programs and criteria. When appropriate, institutions were contacted by letter or telephone to obtain verification or revision of reported data. In some instances, when the number of enrollments reported in any area was significantly larger or smaller than the number reported in the previous survey year, institutions provided explanatory information.

Survey instructions request institutions to classify enrollments for advanced degrees according to major field of study, and to do so as specifically as the lists of specialties in the broad discipline divisions permit. For example, a student of educational psychology specializing in teaching the mentally retarded should be reported under "education of the mentally retarded" (code 0810), rather than under the somewhat broader category of "educational psychology" (code 0822) or the broadest available category, "education, general" (code 0801). In practice, however, institutions can report data only to the level of detail provided in their individual record-keeping systems. For some individual institutional programs, therefore, readers may observe differences between the categorization they are familiar with and those shown in the institutional listings.

ORGANIZATION OF THE TABLES

This report contains 10 tables. The first 6 tables are strictly parallel with tables 1-6 in the 1970 summary report; tables 1 and 2 are also parallel with tables 1 and 2 in the 1970 institutional report. Tables 7-9 are similar to tables 3-5 in the 1970 institutional report. Table 10 is a new table.

Tables 1 and 2 give overall summaries of 1971 advanced enrollments. Table 1 is restricted to candidates for master's and doctor's degrees and table 2 to candidates for first-professional degrees in selected discipline specialties. In these tables, data are presented separately for universities and for other 4-year institutions.

Classified as universities are institutions that give considerable stress to graduate instruction, confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other institutions offering 4 or more years of college-level work, but not meeting the criteria for classification as universities, make up the "other 4-year and over" group.

Table 3 shows counts, by State, of candidates for master's and doctor's degrees. Table 4 gives similar counts of candidates for first-professional degrees in selected discipline specialties. Table 5 has counts by discipline for all advanced degrees. Table 6 presents additional detail on enrollments for master's and doctor's degrees in individual discipline specialties within the broad disciplines reported in table 5. Table 7 is an institutional listing, by State, showing total enrollments for master's and doctor's degrees. Table 8 is similar to table 7, listing enrollments for first-professional degrees in selected specialties. Table 9 is a detailed listing of graduate enrollments for advanced degrees by discipline specialty, State, and institution. Each of the foregoing nine tables has separate counts by level of study (first-year students or students beyond the first year), sex of student, and attendance status (full-time or part-time). Table 10 presents enrollments at the master's and doctor's levels, as well as at the first-professional level, by discipline division and specialty, for public and private institutions, with a separate breakdown by each type of institution and its control.

Users of this report should be aware that there is a split of several professions between those with enrollments for first-professional degrees and those with enrollments for master's and doctor's degrees. This occurs in the discipline specialties of optometry, podiatry, law, and theological professions. First-professional enrollments in the discipline specialties specified are clearly indicated, but the reader is cautioned that all except first-professional enrollments are included in these discipline specialties when they are shown in tabular presentations that display enrollments for master's and doctor's degrees.

It should also be noted that tables 5, 6, 9, and 10 deal with discipline division or discipline division and discipline specialty (formerly called area of study and field of study); they utilize the new classification of instructional programs in accordance with *A Taxonomy of Instructional Programs in Higher Education* (appendix B). When comparing data based on the old and new coding systems, the reader should consult the translation table in the taxonomy for earned degrees conferred and adapt this table to the survey of students enrolled for advanced degrees. The remainder of the tables in this report (tables 1–4, 7, and 8) are not affected in any way by adoption of the taxonomy.

DEFINITIONS

MULTI-CAMPUS INSTITUTION. An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: *(1)* an institution having two or more campuses responsible to a central administration *(which central administration may or may not be located on one of the administratively equal campuses)* or *(2)* an institution having a main campus with one or more branch campuses attached to it.

MAIN CAMPUS. In those institutions comprised of a main campus and one or more branch campuses, the main campus *(sometimes called the parent institution)* is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office.

BRANCH CAMPUS. A campus of an institution of higher education which is organized on a relatively permanent basis *(i.e., has a relatively permanent administration)*, which offers an organized program or programs of work of at least 2 years *(as opposed to courses)*, and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

INSTITUTIONAL SYSTEM. A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

SURVEY COVERAGE

A. PURPOSE: The purpose of this survey is to ascertain the number of students enrolled this term for advanced degrees, the students' fields of specialization, and their progress toward their degrees.

B. SCOPE OF THE SURVEY: Except for question 1 at the end of the survey form, this is **NOT** a survey of all students taking graduate study, but of **all students enrolled for degrees beyond the baccalaureate.**

1. Students to be INCLUDED in the report:

   a. INCLUDE IN PART A students enrolled for first-professional degrees in programs which require at least 2 academic years of previous college work for entrance and which require a total of at least 6 academic years of college work for completion. For example, include students enrolled for first-professional degrees in Law (*LL.B. or J.D.*), Medicine (*M.D.*), etc. as specified on the form. Students enrolled for degrees beyond the first-professional in these fields should be reported in Part B.

   b. INCLUDE IN PART B all other students enrolled for master's degrees; for 6-year degrees such as Education Specialist (*Ed.S.*), Civil Engineer (*C.E.*), etc.; and for doctoral degrees (*Ph.D., Ed.D., etc.*).

2. Students to be EXCLUDED from this report:

   a. Students who, although known to be working on degree requirements, are not formally enrolled for study or dissertation this term.

   b. Students enrolled in graduate-level curriculums which lead to increased professional competence, but which do not terminate in an advanced degree. Students in certificate programs for school principals, for example, should be excluded.

   c. "Special" and "unclassified" students taking courses at the graduate or first-professional level, but not enrolled for degrees.

   d. Post-doctoral students.

   e. Students enrolled at a branch or extension center in a foreign country.

C. EXHIBIT ITEMS. Added to Part B of the survey this year are two "exhibit" items for each of the broad discipline categories. These two items will provide data which hopefully will make possible for the future a simplified form which will be more specifically directed to providing data for estimating trends in graduate education. The two exhibit items are:

First-time students in fall 1971. Report the number of students (*in each discipline division*) who have completed less than one full year of required graduate study and who enroll for an advanced degree for the first time in fall 1971. This number will be smaller than the total number of students in their first full year of required graduate study, because it is restricted to those in their first year who have not been enrolled for the advanced degree prior to the fall term 1971.

Doctoral candidates who have completed all but dissertation. Report the number of doctoral candidates who, as of the fall of 1971, have completed all course and other requirements for the degree **except** for the presentation and defense of the doctoral dissertation.

NOTE: Listings of data for individual institutions are regularly included in published reports of this survey

See GENERAL INSTRUCTIONS and also the separate instructions provided for each of Parts A and B.

NEW CLASSIFICATION OF MAJOR FIELDS OF STUDY

In this survey, as well as in the survey of Degrees and Other Formal Awards Conferred Between July 1, 1970 and June 30, 1971, the new Taxonomy of Instructional Programs in Higher Education is being introduced this year for the first time. The two surveys are consistent with each other in their utilization of the new classification system, which represents a major reorganization of survey format.

Institutions of higher education will already have reported their degree programs in the 1970-71 degrees survey by the time of the present reporting of enrollment for advanced degrees. Consistency by individual institutions in their interpretation of the classification system in the two reports is, as always, essential to the success of both surveys.

Copies of the published taxonomy, which includes translation tables and an index, have been made available to all institutions of higher education. The publication reference is:

U. S. Department of Health, Education, and Welfare, Office of Education, National Center for Educational Statistics. *A Taxonomy of Instructional Programs in Higher Education.* By Robert A. Huff and Marjorie O. Chandler, OE-50064-70. Washington: U. S. Government Printing Office, 1970. Price, $ .45.

The Office of Education is ready to cooperate in every way possible to facilitate the transition to the new classification and to discuss any problems which may arise.

GENERAL INSTRUCTIONS

1. **Time period.** Report only those students enrolled as of the fall term of the current academic year (1971-72).

2. **Institutional coverage.** A separate report is requested from each branch or member of a system, as well as from each entirely independent institution and each "parent" institution. Please provide the information requested in item 6 on the cover page, which is intended to permit complete identification of the reporting unit. **Do not** include students enrolled by branches of your institution located in foreign countries.

3. **Consultation on problems.** If clarification of the definitions and instructions is needed, please consult the survey director, Mrs. Mary Evans Hooper, National Center for Educational Statistics, U. S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202. You may reach Mrs. Hooper by telephone: (202) 962-7301.

4. **Returning forms.** Completed report forms should be addressed: Attention: Room 2136-HEGIS, National Center for Educational Statistics, U.S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

5. **Major changes.** If the number of enrollments you report in any area is significantly larger or smaller than the number you reported last year, it will be most helpful if you will include explanatory notes on the form or on an accompanying sheet of paper. **If students are enrolled in a discipline specialty new to your institution this year, please indicate this by circling the "line number" in column 3.**

6. Please verify your entries and check all the addition before returning the form.

7. SEPARATE SPECIFIC INSTRUCTIONS ARE PROVIDED FOR PARTS A AND B.

INSTRUCTIONS FOR PART A: STUDENTS ENROLLED FOR FIRST-PROFESSIONAL DEGREES IN SELECTED FIELDS

See also the statement of "Survey Coverage" and the "General Instructions" for the survey.

Part A is restricted to enrollments for the first-professional degree in each of the 8 professions listed there. A first-professional degree is defined herein as one which meets all three of the following criteria: (1) it signifies completion of the academic requirements to begin practice in the profession; (2) it is based on a program which requires at least 2 years of college work prior to entrance; and (3) a total of at least 6 academic years of college work is required to complete the degree program, including prior required college work plus the length of the professional curriculum itself.

The "Other" category is to be used only in the event that there are enrollments for first-professional degrees within the 8 professions other than those specifically named in connection with those professions.

Please note that the 8 disciplines have been grouped in Part A for convenience in analysis; in the Taxonomy listing they appear in the numerical sequence indicated by their code numbers.

For each of the 8 disciplines, degrees other than first-professional are to be reported in Part B. (*See "Survey Coverage, paragraph B.)*

In columns 4-7 report those students who have completed the previous college work (*pre-professional training*) required for admission to the professional school but who, prior to this term, had completed less than two semesters or three quarters of full-time study or the equivalent in part-time study in the professional school. Note that these students are identified by the amount of study completed prior to this term, rather than by the number of semesters or quarters in which they have been enrolled.

In columns 8-11 report students who have completed one or more years of required study. Report in these columns students who, prior to this term, had completed two semesters or three quarters or more of full-time study or the equivalent in part-time study for the professional degree.

Classification of enrollment by attendance status: A **full-time** student is one whose academic load in terms of course work or other activity (*such as a thesis, research, or required teaching*) is at least 75% of the load normally required of such students. Time spent by teaching fellows should be included only if such teaching is performed as a requirement for a degree. Employment which is not a part of the prescribed activity for an advanced degree or time spent on work required because of lack of undergraduate background should not be counted as time spent on academic requirements. A **part-time** student is one who is carrying an academic schedule of less than three-fourths the normal load.

New Fields: Please circle the line number (*column 3*) if you are reporting students enrolled in a discipline specialty new to your institution this year. (*See "General Instructions," paragraph 5.*)

Foreign Students: Please answer the question on foreign students at the end of Part A. Foreign students are defined as all foreign nationals studying at institutions of higher education in the United States, regardless of whether or not they plan to remain in the United States.

Add-Checks: Before submission, please verify that the TOTAL column (*column 12*) is the sum of columns 4-11 for each line entry. In addition, the TOTAL line (*line 14*) should show the sums of all entries in columns 4-12.

INSTRUCTIONS FOR PART B: STUDENTS ENROLLED FOR MASTER'S AND HIGHER DEGREES

See also the statement of "Survey Coverage" and the "General Instructions" for the survey.

1. TYPES OF ENROLLMENT: Report all students formally enrolled for degrees beyond the baccalaureate, except for those selected first-professional degrees specified in Part A. First-professional enrollments not reportable in Part A should be reported here. Also report in Part B all students formally enrolled in programs for degrees beyond the first-professional level.

2. GROUPING OF DISCIPLINES: The major fields of study to be reported here, classified in accordance with Section I of the Taxonomy of Instructional Programs in Higher Education, fall in the following discipline divisions:

0100	Agriculture and Natural Resources	1300	Home Economics
0200	Architecture and Environmental Design	1400	Law
0300	Area Studies	1500	Letters
0400	Biological Sciences	1600	Library Science
		1700	Mathematics
0500	Business and Management	1900	Physical Sciences
0600	Communications	2000	Psychology
0700	Computer and Information Sciences		
0800	Education	2100	Public Affairs and Services
0900	Engineering	2200	Social Sciences
1000	Fine and Applied Arts	2300	Theology
1100	Foreign Languages	4900	Interdisciplinary Studies
1200	Health Professions		

3. SKIPPING INAPPLICABLE DISCIPLINES: Skip those discipline divisions which are inapplicable to the programs of your institution. Many registrars, for example, will skip one or more of the following: 0100; 1200; 2300.

4. CLASSIFICATION OF ENROLLMENT BY MAJOR FIELD OF STUDY:

(a) **Specific Classification.** Classify enrollments as specifically as the list of specialties in the broad discipline divisions of the report form permits. For example, report enrollment for an advanced degree in an "accounting" curriculum as Accounting (0502), NOT in Business and commerce, general (0501).

(b) **Majors of Students Preparing to Teach.** The general rule is to classify enrollments according to the major area of specialization. This means, in general, that majors of students preparing to teach an academic subject, such as English, biology, mathematics, or foreign languages, should be reported as appropriate in Letters, Biological Sciences, Mathematics, and Foreign Languages - NOT in Education. On the other hand, majors of students preparing to teach such special subjects as agriculture, art, music, etc. should be reported in Agricultural education (0899-1), Art education (0831), and Music education (0832).

(c) **Unlisted Fields of Study.** When classifying a specialty which does not seem to fit into the list, the institution has two choices: (1) it can be listed by name under "other" if it represents an unlisted specialty, or (2) it can be placed in a "general" category if it covers several listed specialties.

(d) **General Majors.** The term "general major" is used to designate diversified curriculums within an area of study. Ordinarily a general major should be reported in one of the general categories of the report form, such as Physical sciences, general (1901); Social sciences, general (2201); Humanities and social sciences (4903), etc. For example, a concentration in History-Government-Economics should be reported in Social sciences, general.

(e) **Interdisciplinary Studies.** Code 4999 is for reporting fields of study which represent two or more broad discipline divisions; for example, Mass Communications, encompassing segments of psychology, education, business, journalism, social sciences, fine arts, etc., should be reported here. Specify the name of the interdisciplinary study when reporting in 4999.

5. CLASSIFICATION OF ENROLLMENT BY LEVEL OF STUDY:

(a) Students who have completed less than one full year of required study for an advanced degree: Report in columns 4-7 those students who, prior to this term, had completed less than two semesters or three quarters of full-time graduate study or the equivalent in part-time study. Note that these students are identified by the amount of study completed prior to this term, rather than by the number of semesters or quarters in which they have been enrolled.

(b) Students who have completed one or more years of required study for an advanced degree: Report in columns 8-11 those students who, prior to this term, had completed two semesters or three quarters or more of full-time study or the equivalent in part-time study.

6. CLASSIFICATION OF ENROLLMENT BY ATTENDANCE STATUS: A **full-time** student is one whose academic load in terms of course work or other activity (*such as a thesis, research, or required teaching*) is at least 75% of the load normally required of such students. Time spent by teaching fellows should be included only if such teaching is performed as a requirement for a degree. Employment which is not a part of the prescribed activity for an advanced degree or time spent on work required because of lack of undergraduate background should not be counted as time spent on academic requirements. A **part-time** student is one who is carrying an academic schedule of less than three-fourths the normal load.

7. NEW FIELDS: Please circle the line number (*column 3*) if you are reporting students enrolled in a discipline specialty new to your institution this year. (*See "General Instructions," paragraph 5.*)

8. EXHIBIT ITEMS: In each discipline please report counts, or give your best estimates, for "first-time students in fall 1971" and "doctoral candidates who have completed all but dissertation." These data are important as indicators of the rate of production of doctorates in each discipline and as a transition toward a future simplified format for this survey. Please see explanation in the section on "Survey Coverage," paragraph C.

9. ADDITIONAL QUESTIONS: Please answer questions 1 and 2 at the end of Part B.
Question 1 pertains to graduate students not otherwise included in this survey.
Question 2 asks how many of the students in the grand total for Part B are foreign students. **Foreign students** are defined as all foreign nationals studying at institutions of higher education in the United States, regardless of whether or not they plan to remain in the United States.

10. ADD-CHECKS: Before submission, please verify that the discipline totals add up to the grand total, and that the TOTAL column (*column 12*) is the sum of columns 4-11 for each line entry.

A TAXONOMY OF INSTRUCTIONAL PROGRAMS IN HIGHER EDUCATION

This appendix presents the contents of an earlier Office of Education publication of the same name issued as publication number OE-50064 and Superintendent of Documents Catalog No. HE 5.250:50064, U.S. Government Printing Office, Washington: 1970. The original edition was prepared by Robert A. Huff, Western Interstate Commission on Higher Education, and Marjorie O. Chandler, National Center for Educational Statistics. The publication is reproduced here, with appropriate alterations in format, page numbers, etc., for the convenience of readers who need more complete information than provided in the main sections of this report on the conversion of data to the new instructional programs of the Taxonomy, as introduced in the present survey in the continuing series on Earned Degrees Conferred.

FOREWORD

SINCE THE Higher Education General Information Survey package was first assembled from disparate periodic survey forms of the Office of Education in 1966, it has been apparent to the National Center for Educational Statistics and to the higher education community that the various lists of higher education instructional programs in the HEGIS packages needed to be revised to bring them in line with the best current practice and to make them consistent with each other. This publication responds to that need.

The taxonomy of instructional programs will be used in the HEGIS surveys of 1971-72, and all subsequent surveys whenever the data are acquired on the basis of instructional programs. This will include the future surveys of earned degrees and other formal awards, enrollment for advanced degrees, upper division enrollment by major, field of training of faculty, instructional program assignments of faculty, expenditures by instructional program, etc. Because the translation of current records on physical plant space presents some unusual difficulties, present plans contemplate no survey of the allocation of physical plant space by instructional program again until the fall term of 1974.

This taxonomy represents an effort to prescribe not how instructional programs should be organized but how the majority of institutions of higher education actually do organize and record data on instructional programs. At the same time, it attempts to reflect categories for which data are needed. Every institution, association, and professional organization in higher education was asked to assist in the development of this taxonomy, and every comment and suggestion was reviewed and evaluated.

In another form, this taxonomy has been adopted as the core portion of the Program Classification Structure developed by the Western Interstate Commission for Higher Education's Management Information Systems Program (WICHE-MIS), and will be essential for use of the WICHE-MIS standard models and cost exchange procedures.

The present report is being published far in advance of its first prospective use in 1971-72 in order to provide a maximum lead time for any change of institutional records deemed necessary. According to current plans, this taxonomy will not be modified in any major way (apart from the addition of new instructional programs) during the ensuing 5-year period in order that institutions and other agencies may receive a maximum return from the time and effort expended in the construction or modification of file systems. The continued provision of criticism and comment is encouraged both to assist us in minor modifications and to help us prepare for eventual major revision.

INTRODUCTION

BACKGROUND

MANY MEMBERS of the higher education community have recommended modification and updating of the list of discipline specialties in the Higher Education General Information Survey (HEGIS) questionnaires. Moreover, they have urged that the list be made sufficiently flexible and comprehensive for adaptation to overall institutional recordkeeping, apart from HEGIS reporting. This revision—incorporating the suggestions—has the following specific objectives:

1. To produce a list of instructional programs that would be equally applicable to HEGIS data on students, faculty assignments, finance, and space.
2. To reflect as accurately as possible the instructional programs and curriculums now in existence or likely to appear in the future.
3. To build enough comprehensiveness and flexibility into the list so that it may remain relatively stable.
4. To construct a list which is acceptable and practical for general institutional recordkeeping, for management information systems, and for program budget structure employed by higher education institutions.
5. To provide a system for translating records based on old coding procedures (e.g., the Higher Education Facilities Classification) into the new specialty list.

The standard list of instructional programs presented in this publication was developed cooperatively by the National Center for Educational Statistics and the National Center for Educational Research and Development (both of the Office of Education), and the Western Interstate Commission on Higher Education.

A crucial feature in the development of the standard list was a comprehensive review process involving all sectors of the higher education community—Federal agencies concerned with statistical data on higher education, institutions of higher education, and higher education associations and organizations. The review process began in the spring of 1969 when a preliminary draft of the list was circulated to a number of persons in the higher education community; in addition, field visits were made to a sample of institutions for discussion of the list. Comments generated by the first review cycle provided a basis for a revision that was developed by a committee made up of representatives of the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council of Graduate Schools in the United States, together with representatives of the Office of Education and the Western Interstate Commission. The resulting draft was then sent to Federal agencies, to education associations and organizations, and to *all* institutions of higher education. The final version presented here reflects not only comments volunteered by the numerous reviewers but also the outcome of a series of meetings with representatives of other Federal agencies.

After the standard list itself had been developed, the final step was to construct the index and the translation tables. The translation tables show the relationship of the new system to the systems used in the HEGIS Earned Degree survey, the Higher Education Facilities Classification, the Vocational Education and Occupations classification systems, and the U.S. Bureau of the Budget Standard Classification of Fields of Science and Engineering.

A VIEW OF THE INSTITUTIONAL REPORTING TASK

No centrally prepared list can precisely match the pattern of discipline titles and content within all institutions. Despite institutional variations, the new list is designed to contain a definite place for *every* specialization needed for classifying students, faculty assignments, finance, and facilities. To the extent that the list attains this objective, institutions may also find it useful for their own records systems even though it is not a "perfect fit."

Each institution, then, will interpret its own programs in terms of the new HEGIS list and translate its own titles into HEGIS terminology. For example, what one college calls "biostatistics" may be judged comparable to "biometrics" on the HEGIS list. Some institutions may find it convenient to record their own discipline codes next to the HEGIS codes in the index.

ERIC 394

Once the proper reporting category has been decided for each degree program that an institution offers, the preparation of HEGIS reports should be quite simple. For example, each student's major field, each faculty member's teaching assignments, and each space allocation could be coded according to the discipline specialization list and the codes stored in the institution's regular data file. Then, by a fairly routine clerical operation (or a simple computer program), HEGIS and other reports could be compiled from institutional files. If an institution has kept its records in accordance with the old HEGIS codes (or with one of the other systems covered by the translation tables), conversion to the new system should be quite straightforward.

It should be recognized that a particular faculty member, student, or facility may require several codes for complete identification. For example, a faculty member may have a series of degrees, each in a different field; he may be assigned by the institution to work in some other field; and he may consider that his primary research competence is in still another field.

In attempting to use the new HEGIS list, the user is urged to "browse" through the entire list to see how the discipline specialties have been ordered. Such browsing will serve at least two purposes: first, to identify substantial portions of the list that may be ignored by a particular college and, second, to avoid classifying a program into a semiappropriate category near the start of the list when there is a more appropriate category further along.

THE DISCIPLINE CLASSIFICATION

The new HEGIS classification is divided into two main sections. Section I deals with conventional academic subdivisions of knowledge and training; section II, with technologies and occupation specialties related to curriculums leading to associate degrees and other awards below the baccalaureate.

Within the two sections, each discipline *division* is shown in bold type at the beginning of each specialty list, along with a brief definition. Under the discipline division are listed the discipline *specialties*. It should be noted that the discipline specialty list is not intended to be a list of individual courses.

Inevitably, the decision that certain specialties belong under one division rather than another is somewhat arbitrary; some users will disagree with certain classifications. For example, one institution may classify botany under agriculture and another may classify it under biological sciences; economics may be classified under business and commerce or under social studies. The important point is that data can be reported in the appropriate, specific category. The user who wishes to aggregate in a manner other than that implied by the HEGIS discipline division may then do so.

The first title under most of the discipline divisions is listed as a *general* category. This is intended to provide some flexibility in the reporting scheme and should be useful for broad programs that encompass several of the listed specialties.

When attempting to classify an individual or a facility which does not seem to fit into the list, the institution has two choices: (1) it can be listed by name under "other" if it seems to represent an unlisted specialty, or (2) it can be placed in the "general" category if it seems to cover several listed specialties. Such fine points must be decided at the institutional level, but it is hoped that the index is comprehensive enough to minimize the need for such decisions.

THE INDEX

To satisfy the many purposes for which the taxonomy is intended, it must be very lengthy and diverse. To make it easier to use, it is followed by two alphabetical indexes of program titles—including a number of related titles not appearing in the discipline classification—showing the discipline category in which the item should be placed. The first index applies to the conventional academic subdivisions of knowledge; the second, to technologies and other occupational specialties related to curriculums leading to associate degrees and other awards below the baccalaureate.

THE TRANSLATION TABLES

The tables on pages 21–32 of this publication provide a means for translating into the new coding system from:

1. The list of academic specialties used in the HEGIS survey of degrees awarded in 1968–69. Essentially the same list was used in the HEGIS survey of Students Enrolled for Advanced Degrees.
2. The Standard Classification of Organizational Units and Subject Fields, from the Higher Edu-

395

cation Facilities Classification and Inventory Procedures Manual.

3. The list of technical education programs from *Vocational Education and Occupations,* published by the U.S. Office of Education and the U.S. Department of Labor, Manpower Administration.
4. The U.S. Bureau of the Budget Circular A-46, Standard Classification of Fields of Science and Engineering.

In reviewing the translation tables, it will be noted that the new list provides coverage of all specialties included in the four documents cited above. In many instances, the new list provides for much greater specificity of reporting than the old systems. For example, the HEGIS Earned Degree list uses a single code (7710) for area studies; by comparison, area studies involves 15 different codes in the new list, with separate codes for East Asiatic studies, Islamic studies, Russian and other Slavic studies, and so forth. Similarly, BOB Circular A-46 provides only a single code for chemistry as compared with five in the new list (organic chemistry, physical chemistry, general chemistry, and so forth).

CODING

It will be noted that, within the discipline divisions, the lists of discipline specialties have been arranged without strict adherence to alphabetical or other logical sequence. This is done purposely: any additions to the lists during the next few years can be made without disturbing the coding sequence or the rationale of the listing arrangement. Furthermore, this system purposely avoids arbitrary organizations of fields into questionable and potentially controversial hierarchies of subfields and sub-subfields within a discipline division. Thus, avoidance of a logical sequence for the discipline specialty lists is deemed desirable and actually becomes the rationale for the arrangement.

A block coding scheme has been used in this taxonomy. The first two digits of the four-digit code identify the discipline division. Numbers 01 through 49 are used for identification of the conventional academic fields of section I. Numbers 50 and above are used as the first two code digits to identify the technologies and vocational specialties of section II. Under all discipline divisions, the last two digits of the code are used to identify the specialties.
